**Place of Performance:**

USA

## Description

[View Changes](#)

**Amendment 0001 is issued to correct header on pages 2-31 and revise Section 3.4.5, Table 1- ROM Template.**

The Defense Information Systems Agency (DISA) Cybersecurity Directorate (ID), through the DISA Procurement Services Directorate (PSD), is seeking White Papers from our industry partners on a proposed solution for the Thunderdome Zero Trust Architecture (ZTA) and implementation.

The Government desires a new approach to deliver an initial, minimum viable product (MVP) for the architecture of a Secure Access Service Edge (SASE), Software Defined (SD) Wide Area Network (WAN) with Customer Edge and Application Security Stack prototypes within six months of award for 25 SD-WAN sites and 5,000 users. Improvement and operational implementation of these capabilities through the year 2025 are planned. DISA expects the performing vendor to play a critical role interacting with key stakeholders across DISA and the Fourth Estate.
